City Colleges of Chicago Modernize Technical Education Offering

Richard J. Daley College Spends \$45M to Add Skills to Manufacturing Center

(January 28, 2019) – CHICAGO, IL – Richard J. Daley College, which serves as a hub for technical education in the Chicago land area, upgraded the Manufacturing Technology and Engineering Center located at 4701 W. 76th Street. This manufacturing center provides technical education opportunities that keep pace with today’s manufacturers, who have a strong desire to hire an educated and trained workforce.

The Manufacturing Technology and Engineering Center is the largest and most advanced facility for advanced manufacturing in the city of Chicago. It will serve as the hub for individuals looking to earn certifications, workforce training, and an associate’s degree, continuing education that will transfer opportunities to four-year colleges for careers in manufacturing and engineering technology.

Daley College assessed the local need, and then worked with Moss Enterprises to update curriculum offerings. Included in the update:

- Automation Training
- Electrical Training
- Electronics Training
- Fluid Power Training
- Mechanical Training
- Process Control Training

The investment in technical education will benefit both students and area manufacturers. Contributing to the updated curriculum were Moss Enterprises and Amatrol.

About Moss Enterprises: Moss was founded in 1969, and is the most progressive education technology supplier in the Upper Midwest. Moss supplies technical education equipment, curriculum materials, technical support, and staff development services to students, teacher, administrators, and industrial manufacturers. We support Iowa, Illinois, Indiana, Nebraska, Minnesota, North Dakota and South Dakota. www.mossent.com

About Amatrol: Amatrol creates innovative, interactive learning solutions for industry and education to equip people with the skills to master technical systems, solve problems and adapt to a rapidly-changing

workplace. We partner with our clients to provide an unmatched learning experience. Learning solutions are designed and built by employees who are experts in their field, integrating the best practices in education and training to deliver knowledge and skills for real jobs. www.amatrol.com/
