

zSpace[®]

TRAINING,

SUPPORT AND

PROFESSIONAL DEVELOPMENT

Inspire student understanding through an entirely new way of learning. Beyond the components of the zSpace STEM solution, zSpace has created an entire program dedicated to supporting schools and districts to ensure success for teachers, students and administration.

An exclusive program for teachers to ensure they have all they need to revolutionize the way students learn.

Experiment, Discover and Create: Learning and Teaching with Immersive 3D

zSpace[®] delivers an entirely new way of learning through immersive exploration. The zSpace STEM package combines the zSpace high definition 3D experience and natural user interface with learning applications built around the Next Generation Science Standards.

Installation and Technical Training

One Day of On-site Installation and Technical Training:

It all starts with pre-installation planning followed by a full day of installation support combined with training for your school technical personnel. We show you how to setup zSpace, ensure all systems are up and running, review the features of the system and provide hands-on training for up to 5 of your staff on the technical aspects of zSpace.

Agenda:

- Components of zSpace
- Setting up zSpace hardware
- Software installation and support
- Launch and navigate through the zSpace system
- Set-up the zView video presentation feature
- Basic software packages and features

About zSpace, Inc
zSpace Inc is a leading-edge technology provider located in Sunnyvale, CA
The company is privately held and has filed more than 30 patents for its innovative technologies.

Professional Development & Support

One Day of On-site Professional Development:

Our teacher professional development has been crafted by teachers for teachers. We show how to use the zSpace tools to create an immersive learning experience for students. Together, we'll build the confidence to deliver standards aligned projects that convey concepts in unique and memorable ways for students everywhere. This professional development day is designed for up to 12 teachers.

Agenda:

- Leverage project based learning
- Inspire student understanding
- Launch and navigate through the zSpace system and zView video capture feature
- Understand how to use the Project Toolbox for activities preloaded in zSpace
- Learn to lead fun activities
- Discover zExplorer and access models applicable to the sciences and more

Six Months of "Success" Support:

We want to be sure that your experience with zSpace is a success, so we'll have regularly scheduled calls with your team members - teachers, administrators, and technical staff - to answer questions and provide support. Weekly calls are to be expected initially, and then continue as needed to ensure you are getting the most out of the zSpace experience. zSpace technical support is also always available to help with STEM station questions.
